

Technology Startup Program Offering

Stikeman Elliott's technology practice group in Vancouver is focused on serving the needs of local entrepreneurs and technology companies. Our Startup Program was established in 2012 with the aim of bringing access to top-tier legal services to the local startup community.

Clients who participate in the program enjoy the following benefits:

Legal Basics for Startups - One-on-One Meeting

- We will meet with your team one-on-one to provide an overview of legal basics for startups and answer any questions you may have (included in initial retainer fee).

Access to Suite of Standard Legal Documents

- We provide a comprehensive suite of template legal documents as needed without additional cost to you.
- We continuously grow our library of template legal documents and we may be able to add or create new templates upon request.

Electronic Corporate Records

- We will populate an online data room with your electronic corporate records including current share register, key corporate documents and legal agreements that you can share with potential investors for due diligence purposes.

Legal Fee Deferral

- Eligible to defer payment of up to \$5,000 in legal fees (the "Tab").
- Fees for legal services are added to your Tab at a 10% discount from our standard rates.
- Your Tab is not payable until the earlier of (a) your company's next financing event; or (b) 12 months from signing a retainer letter.
- We provide monthly updates on the Tab.
- Tab overages and cash disbursements are payable when incurred.
