

BC TECH association

Our Vision

A BC that values technology as a positive force for good—for the economy, for society, for our future.

Our Mission

To make BC the best place to grow a tech company.
We believe that one day all companies will be tech companies.

Our Values

Be of Service—for a purpose
Succeed Together—with strong partnerships
Pay It Forward—we're all in for BC

Our Distinctive Contribution

We are the voice of BC's Technology Industry. While our members focus on growing their businesses, BC Tech leads the way in tackling the gaps and leveraging the strengths of our ecosystem. We advocate for policies, deliver impactful programming, provide leadership in innovation and technology adoption, educate and inform the tech community, and serve as the very best of BC Tech at our annual Technology Impact Awards.

Where We Focus And How We Deliver

Our focus is to grow the number of home-grown anchors.

Our ecosystem has many strengths and one key gap: a scarcity of home-grown anchor companies, the backbone of a top-10 tech ecosystem. We say it fearlessly: tackling this difficult problem is how BC's bright future.

Our approach is to prioritize for optimal impact.

We base our recommendations and programs on data and research, and diligently measure our impact. We are solutions advocates, not problem describers, focused on things that have the most impact.

Our people are credible, knowledgeable, thought leaders who educate and animate the community.

We believe technology is a tool for good and we build strong coalitions of support to advance our cause and secure the funding necessary to sustainably expand our mission.
