BC TECH association

YEAR IN REVIEW

2017 - 2018

Tech is a tool for good in our lives, in our communities, and in our province. BC Tech is driven to make BC the best place to grow a tech company by helping firms grow and scale into anchors—the large companies that drive both BC's tech sector and the economy. We do this by providing the places, the programs and advocating for the policies that help the tech community collaborate, learn, and grow.
